

Garden Life Planner

Grow your garden smart

Description:

Keeping all the dates regarding your garden in your head is overwhelming. Let our application to help you store and remind you all important agriculture events.

This app manages your gardening calendar: when to plant your vegetables, when to fertilize, when to harvest. It synchronizes with your personal calendar or calendars of your peers, you can choose if you wish to work just on weekends. It gives you guidance and ideas and also keeps you organized.

At first you pick your location and soil type, whether you have a green house or humidity receptor in your garden. Application synchronizes with weather forecast. It suggest you how to fertilize your type of soil.

Our application can help you to pick the best vegetables for your garden based on soil type and location.

Application can help you to combine vegetables next to each other and save this information for next year use.

The application can store your yearly harvest results. Together with weather data can analyze the results and suggest next year gardening plan.

You can sell vegetables you don't need via your preferred market place.

Functions:

- 1) plans calendar for gardeners
- 2) chooses vegetables based on location and soil type
- 3) makes spacial plan what vegetables grow well together
- 4) store harvest results
- 5) connects to favorite market place to sell surplus

Potential users

- 1) Seasoned farmer who wants to have all the dates and data under control
- 2) Beginner who wants to start his garden and needs some guidance
- 3) Hobby gardener who wants to try some new approaches and experiment
- 4) Urban community with communal garden to help them synchronize their care about the garden

Description of one users

Ideal user: Dan, 35 years, small village

Has new family, just bought house in small village on mortgage. House has garden, Dan wants to try gardening but doesn't have any previous experiences. He has and wife and small kids, he wants to save money, he wants to try gardening. Since he is new in this field, he would appreciate some guidance, he likes that the application helps him to plan all the gardening events in his calendar through the whole year and he can synchronize these with his wife.

Client goals:

- 1) Support home gardening.
- 2) Support food consciousness.
- 3) Help to sell surplus.
- 4) Earn money.
- 5) Built functional application

Existing apps:

1) Gardroid - Vegetable Garden
in vegetable profile has nice icons, big database of plants, starting from pant profile to sav

2) Gardenize - Garden Planner and Plant Journal
for people who knows what they are doing, knows their plants already, tips from users set garden, social network, plant, areas and event notes, starts from area

3) Soving Callendar -
also with diseases and pets for specific vegetables, setting reminders, month overview - nice , plant profile - in table, with friends and enemies
